

Campus

We are building a unique European talent pool by providing up-to-date knowledge and skills to help turn learners into healthcare leaders and entrepreneurs, who will shape the future of Europe's health.

Campus leads two strategic initiatives:

- EIT Health Alumni Network
- Empowering Women Entrepreneurs in Health Innovation - WE Health

Knowledge Triangle Integration

For Innovation Projects:

Summerschools have been successfully integrated, e.g., they have addressed rare cancers, developed apps that help diabetes patients regulate their diet, and sought new approaches using big data to improve the lifestyle of senior citizens.

For Accelerator Projects:

Try to find a way how you can build a bridge for Campus alumni to your Accelerator activity.

Training for Students

Courses for students and post-doctoral researchers to enhance their health-related innovation and entrepreneurial capabilities.

- Degree Programmes (e.g. Master courses)
- Innovation Skills for Students (short courses)
- Summer Schools combining top research with innovation and entrepreneurship skills

Training for Executives and Professionals

For executives: Our activities address senior policy makers, decision makers working for payers and care givers, and civil servants of municipalities.

For professionals: Our courses place patients and citizens in the centre, by moving towards a holistic view. The courses are designed to give caregivers the latest technological tools.

Training for Entrepreneurs and Innovators

This Campus activity line offers market-entry support for healthcare entrepreneurs and innovators, who have the opportunity to transfer into EIT Health's other pillars for additional support.

Examples:

- Innovation Fellowships
- Entrepreneurship Lab (E-Lab)

Training for Citizens

Digital programmes: Massive Open Online Courses (MOOCs), and other types of digital engagement, allow a wider outreach. Therefore, EIT Health offers online courses, e.g. on mental health, frailty and functional loss or kidney diseases.

Citizen Festivals: We will promote active ageing and healthy living in the context of city festivals.
