Claudia holds a PhD in Medicine and a diploma in languages and has been working in international research and innovation projects for 15 years, supporting successful applications to a wide array of national and international funding programs such as FP6, FP7, Horizon2020, BMBF, IMI, EDCTP and EIT Health. She has guided more than 25 resulting projects with funding of up to 28 million EUR through grant preparation and implementation, and many of those to successful follow-up initiatives. Claudia's EIT Health involvement dates back to the very first call of the programme and includes proposal and project support as well as hearing coachings and contractual advice. Her particular focus in recent years have been clinical studies and collaboration with industry.
