AMR Hackathon 2018

30th Nov - 2nd Dec 2018 | Marsillius Kolleg, Heidelberg, Germany

Application Deadline: 23 Nov 2018, C.O.B.
Online Applications: clc.germany@eithealth.eu

You are warmly invited to attend a truly unique EIT Health event, exploring and discussing current developments and successes in combating Antimicrobial Resistance (AMR) across Europe.

According to the WHO and the CDC, AMR is an increasingly serious threat to global public health that requires action across all government sectors and society. And we are looking for you to join the fight!

Hackathon participants will learn about best-practice guidelines/examples from six countries across Europe, which EIT Health is active in, reflecting on local success stories and challenges. Outputs from the hackathon sessions will be made available to DG Santé and local and national authorities, therefore impacting policy and strategic approaches to deal with AMR in Europe.

So attend the hackathon and join the fight! Turn over to find out how.

EIT Health is supported by the EIT, a body of the European Union

What is in it for me?

The winning team (based on the outcomes and the presentation on the final day) will win an entry ticket to the EIT Health Summit in Lodz, Poland (4-5th Dec 2018) and all reasonable T&A costs will be reimbursed up to a maximum of 800€ per team (teams from Poland) and 1600€ per team (teams from other European countries).

How much will it cost me?

Registration and participation are completely free for all participants (but participants will be selected based on merit only). Moreover, all meals during the hackathon are covered. Reasonable T&A expenses will be reimbursed up to a maximum of 150€ pp (participants from Germany) and 400€ pp (participants from other European countries).

How do I apply?

All applications should be addressed to Mohammad Chehadé and submitted via email to this address: clc.germany@eithealth.eu. Applications should be written in English, should include a short motivation and a CV. Having publications in the field is encouraged.

Students, doctors and anyone who is directly or indirectly related to the field of health in general and AMR specifically is more than welcome to send their application. The hackathon language will be English thus you must have excellent command of the language. The more languages you speak the merrier (Polish, Spanish, French, German, Dutch are particularly interesting in the context)!

Who is organizing all of this?

EIT Health is one of the largest healthcare initiatives worldwide. Its goal is to sustainably advance the foundations of healthcare and thus promote the future conditions for healthier living and wellbeing of people across Europe.

EIT Health does this by leveraging the expertise of more than 140 leading organisations spanning key areas of healthcare such as Pharma, MedTech, Payers, Research Institutions and Universities. With a budget of 2 billion EUR over the next decade, EIT Health will purposefully invest in Europe's best entrepreneurial talents and creative minds to foster the development and commercialisation of smart product and service solutions in the health sector

EIT Health is headquartered in Munich and there are six co-location centres spread across Europe; one of which is EIT Health Germany located in Mannheim/Heidelberg, Germany.
