start-ups ?

6 success factors for building an impactful innovation system in healthcare

Access to world class IP

Entrepreneurial mindset
& Know-How

Access to flexible
infrastructure

Network of experts,
business talents and
experienced founders

Access to capital and
fundraising strategies

Access to international
networks and global hubs

a flourishing environment for life science founders

vision

→ The independent Life Science Factory, initiated by Sartorius, promotes scientific progress and the foundation of life science start-ups. We intend to establish Göttingen as the »location of choice« for life science start-ups by creating the necessary infrastructure and platforms.

purpose

→ Our mission is to foster an entrepreneurial spirit by identifying future-oriented technologies and support both start-ups and spin-offs in the life science sector.
→ For this we are working closely with many partners.

Göttingen is just the start

→ Stay tuned.
